# Sway Master®

PATENTED **Electronic Sway Control**

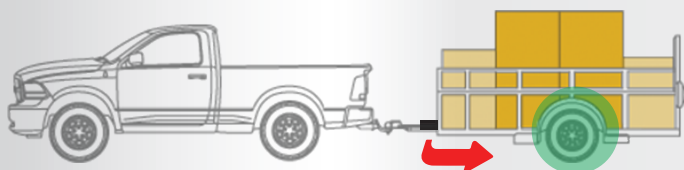

**NOW COMPATIBLE WITH INTEGRATED BRAKE CONTROLLERS\***

**Bringing Sway Control Into  
the 21st Century**

### WHAT IT DOES AND HOW IT WORKS

- Mitigates sway when weight distribution is not needed
- Provides simultaneous braking when sway is detected to all trailer brakes on 1 to 4 axle trailers
- Utilizes solid state rate gyroscope to detect sway and GPS to determine trailer speed
- Unit activates appropriate amount of braking based upon trailer speed and amount of sway

\* Through 2018 model vehicles

### FEATURES AND BENEFITS

- EASY customer installation with SIMPLE self-tapping bolt to mount unit on trailer tongue
- Plug and play design with NO HARD WIRING & self-calibrating with NO set-up required
- Unit is enclosed in tough, water-resistant housing & electronics conformal coated for added protection
